LAB REPORT TEMPLATE

Title:

• A brief concise, yet descriptive title

Statement of the Problem:

- What question(s) are you trying to answer?
- Include any preliminary observations or background information about the subject

Hypothesis

- Write a possible solution for the problem
- Make sure this possible solution is a complete sentence
- *Make sure the statement is testable*
- The statement should reference the independent and dependent variables: such as "The plant group receiving (independent variable i.e. fertilizer) will (dependent variable i.e. produce more fruit) than the plants that did not receive (independent variable i.e. fertilizer)

Materials:

• Make a list of all items used in the lab

Procedure:

- Write a paragraph or a list that explains what you did in the lab.
- Your procedure should be written so than anyone else could repeat the experiment.

Results:

- This section should include any data tables, observations, or additional notes you make during the lab.
- *All tables, graphs and charts should be labeled appropriately.*

Conclusions:

- Accept or reject your hypothesis
- EXPLAIN why you accepted or rejected your hypothesis using data from the lab.
- Include a summary of the data averages, highest, lowest, etc. to help the reader understand your results.
- List one thing you learned and describe how it applies to a real-life situation.
- discuss possible errors that could have occurred in the collection of data (experimental errors)

MIDDLE SCHOOL LAB REPORT

(Name)	(Date)
Title:	
Purpose/Problem	
Hypothesis:	
Materials/Supplies:	
Procedure:	
Observations and Data:	
Conclusion/Summary:	

Conclusion Do's and Don'ts

- **Do** draw an illustration or a graph, if appropriate.
- Don't list the data again, but summarize, discuss, and analyze the data.
- **Do** explain why your hypothesis was correct or incorrect from your observations or data.
- Don't give the procedure again, but do point out possible sources of error.
- Don't forget to break up your ideas with more than one paragraph. Your conclusion is an essay.

Helpful format for writing a conclusion		
This lab (experiment) investigated		
In order to study the problem we		
My results showed , thus proving my hypothesis was		
(correct/incorrect).		
believe the results are (accurate/inaccurate) because		
In order to further investigate this problem, next time I would		
The above was adapted from Cheryl Randall's Science Lab Report found at
